## Question: 1

In which phase of the cloud service lifecycle are service instances de-provisioned?

Response:

- A. Service termination
- B. Service creation
- C. Service operation
- D. Service planning

**Answer: A**

## Question: 2

A cloud provider installs a virtual firewall on a hypervisor to reduce the scope of a security breach when there is already a network-based firewall deployed in the cloud environment.

Which strategy did the cloud provider use to mitigate the risk of security threats?

Response:

- A. Trusted computing base
- B. Defense-in-depth
- C. Information assurance framework
- D. Adaptive security

**Answer: B**

## Question: 3

Which statement describes an image-based backup solution?

Response:

- A. The capability to perform recovery only at the file level is provided
- B. Data is transferred directly from the guest OS to the backup device
- C. Backup processing is offloaded from virtual machines to a proxy server
- D. The backup agent is required inside the virtual machine to back up

**Answer: C**

---

### Question: 4

What is the goal of lean practices in a software development methodology?

Response:

- A. Create quality software with the minimum number of team members
- B. Create quality software in the shortest time period at the lowest cost
- C. Develop software using 12-Factor modern application practices
- D. Develop and deploy software using third platform technologies

**Answer: B**

### Question: 5

Which statement describes the OAuth mechanism?

Response:

- A. An open authorization mechanism that allows a client to access protected resources from a resource server on behalf of a resource owner
- B. A network authentication protocol that provides strong authentication for client/server applications by using secret-key cryptography
- C. An open authentication standard in which a service provider uses authentication services from an OpenID provider
- D. A mechanism designed to examine data packets traversing a network and compare them to a set of filtering rules

**Answer: A**

### Question: 6

What condition can result in the development of a "shadow IT" organization?

Response:

- A. Aging facilities, and outdated policies and technology
- B. Bypassing of internal IT and looking elsewhere for IT services
- C. Increasing number of end user devices and different access points
- D. Lack of cloud extensibility inside an organization

**Answer: B**

---

### Question: 7

How is the fulfillment process of a service request implemented in a cloud environment?

Response:

- A. Cloud Administrator manually handles service requests
- B. Element manager collects service requests directly from the catalog
- C. Workflows defined in the orchestrator direct the process
- D. Orchestrator allocates the same amount of resources to all service requests

**Answer: C**

### Question: 8

Which type of zoning prevents unauthorized access, even when node ports are re-cabled to a different fabric port on a Fibre Channel switch?

Response:

- A. eui-based
- B. WWPN-based
- C. Port-based
- D. Mixed

**Answer: B**

### Question: 9

What term refers to businesses that do not have a digital plan, and have limited initiatives or investments related to digital transformation?

Response:

- A. Digital Leaders
- B. Digital Laggards
- C. Digital Adopters
- D. Digital Evaluators

**Answer: B**

### Question: 10

---

What is the effect of network broadcast traffic reaching the configured network storm control threshold on a switch port?

Response:

- A. Broadcast traffic is blocked. Subsequent broadcast frames are dropped for a specific interval.
- B. Broadcast traffic is allowed partially, maintaining the traffic rate below the threshold level.
- C. Switch port bandwidth increases automatically to accommodate the traffic.
- D. The switch port is disabled. Administrator intervention is required to enable it.

**Answer: A**
