## Question: 1

A CIO decided to migrate their test and development environments to IBM Cloud. These test virtual machines are only used during business hours and can be powered off when not in use. The CIO does not want to be charged for consumption of the virtual machines when they are powered off.
Which IBM Cloud for VMware Solutions offering meets the requirements of the CIO?
Response:

A. VMware Solutions Dedicated - vCenter Server
B. VMware Solutions Dedicated - VMware vSphere
C. VMware Solutions Shared - Reserved
D. VMware Solutions Shared - On-demand

**Answer: D**

## Question: 2

Which IBM Cloud for VMware Solutions Shared deployment option guarantees preallocated resources?
Response:

A. On-demand
B. Reserved
C. Powered On
D. Dedicated

**Answer: B**

## Question: 3

Which describes the benefits of IBM Cloud Bare Metal Servers for Virtual Private Cloud (VPC)?
Response:

A. Bare metal servers for VPC have a wide variety of customizable options that give the client a platform for high performance workloads with the same network performance of traditional VPC servers
B. Bare metal servers for VPC have a wide variety of customizable options that give the client a platform for high performance workloads with up to 4x network performance of traditional VPC servers
C. Bare metal servers for VPC have preset profiles that give the client a platform for high performance workloads with the same network performance of traditional VPC servers

D. Bare metal servers for VPC have preset profiles that give the client a platform for high performance workloads with up to 4x network performance of traditional VPC servers

**Answer: D**

## Question: 4

How are Veeam backups archived and moved from the performance tier to IBM Cloud Object Storage?
Response:

A. The Veeam console can be used to set policy and automate moving backups to IBM Cloud Object Storage
B. The backup administrator must move backups manually to the appropriate Cloud Object Storage bucket
C. The backup administrator must set policy automating moving backups to IBM Cloud Object Storage using the IBM Cloud Portal UI
D. Policy settings for the target IBM Cloud Object Storage bucket are used to automate moving the backups from the performance tier

**Answer: A**

## Question: 5

Which profile family for IBM Cloud Bare Metal Servers for VPC is the best fit for common cloud applications with moderate traffic?
Response:

A. Balanced
B. Compute
C. Memory
D. Storage

**Answer: A**

## Question: 6

The architects want to change the device type of your private network endpoint in the virtual data center configured with IBM Cloud for VMware Solutions Shared. Which is correct concerning the private network endpoint?
Response:

A. Delete existing and create new

B. Create a new one then delete the old one
C. Edit the existing with the new device type
D. Do nothing; there is only one possible device type

**Answer: A**

## Question: 7

A VMware administrator needs to move a number of VMs from their on-premises data center to IBM Cloud. The administrator decided on a solution that can provision workloads within minutes. What solution should be used?
Response:

A. Zerto
B. Veeam
C. PrimaryIO
D. VMware HCX

**Answer: C**

## Question: 8

IBM Cloud for VMware Solutions Regulated Workloads is designed following the zerotrust model leveraging Entrust CloudControl to implement granular Role-Based Access Control (RBAC). Which role is responsible for configuring Entrust CloudControl following deployment?
Response:

A. Entrust security administrator
B. IaaS network administrator
C. NSX-T administrator
D. Entrust super administrator

**Answer: D**

## Question: 9

Which two locations can the VMware administrator install a Juniper vSRX appliance on IBM Cloud?
Response:

A. Classic virtual server instance
B. Workload cluster
C. Management cluster

D. Edge services cluster
E. Bare metal server

<div style="text-align: right; border: 1px solid black;">

**Answer: C,D**

</div>

## Question: 10

The client has opted for the VMware Software Defined Data Center (SDDC) architecture in IBM Cloud VMware offering. They want to use Kubernetes for their Application Moderization. What other automated service should be included in the solution?
Response:

A. Red Hat OpenShift on IBM Cloud for VMware Solutions
B. Red Hat OpenShift on IBM Cloud for VPC
C. IBM Kubernetes Service on IBM Cloud for VMware Solutions
D. IBM Kubernetes Service on IBM Cloud for Classic

<div style="text-align: right; border: 1px solid black;">

**Answer: A**
