# Latest Version: 6.0

## Question: 1

In the context of extending App Connect Enterprise, which of the following statements are true?  
(Choose two)

Response:

- A. Custom plugins can be created to extend the functionality.
- B. Extending the tool always requires changes to the source code.
- C. It is possible to integrate with custom security models.
- D. Extensions can only be developed in C++.

**Answer: A,C**

## Question: 2

Which of the following are effective optimization techniques for integration solutions?  
(Choose two)

Response:

- A. Minimizing network calls within message flows
- B. Using larger data chunks to reduce the number of messages
- C. Ignoring error handling to speed up processing
- D. Increasing the number of concurrent threads without limit

**Answer: A,B**

## Question: 3

Which of the following is a key security measure for protecting message flows?

Response:

- A. Decreasing the number of message nodes
- B. Implementing robust encryption
- C. Reducing the message flow speed
- D. Ignoring error messages

**Answer: B**

---

### Question: 4

An Integration Server consumes a large amount of memory on a system. Which diagnostic can help determine where the memory is spent?

Response:

- A. Flow Statistics
- B. Activity Logging
- C. FlowThreadReporter
- D. Resource Statistics

**Answer: D**

### Question: 5

Among the logging levels listed below, which one offers the highest degree of detail beneficial for troubleshooting purposes?

Response:

- A. INFO
- B. WARN
- C. DEBUG
- D. ERROR

**Answer: C**

### Question: 6

Consider a message flow that connects to a backend service via HTTP. The backend service has limited throughput capabilities and can become overwhelmed due to spikes in traffic.

What can be done to ensure that a message flow does not flood a backend service with too many requests?

Response:

- A. Use a Workload management policy.
- B. Configure a Business Transaction Definition.
- C. Set the maximum request rate on the HTTPRequest node.
- D. Limit the number of additional instances on the message flow.

**Answer: A**

---

### Question: 7

In IBM App Connect Enterprise, what advantage does DFDL provide over other message modeling techniques?

Response:

- A. It supports a wider variety of data formats.
- B. It requires less computational resource for parsing.
- C. It is easier to learn and implement.
- D. It provides built-in support for data encryption.

**Answer: A**

### Question: 8

How can the default location of BAR files be changed in the App Connect Enterprise Toolkit?

Response:

- A. By modifying the BAR file extension.
- B. By generating the BAR file using custom scripts.
- C. By creating a new integration project for BAR files.
- D. By changing the preferences in the Build BAR settings.

**Answer: D**

### Question: 9

Where are connectors created and published?

Response:

- A. Toolkit
- B. Designer
- C. Dashboard
- D. Automation Explorer

**Answer: D**

### Question: 10

---

Developing comprehensive \_\_\_\_\_ is crucial to safeguard message flows against unauthorized access.

Response:

- A. color schemes
- B. marketing strategies
- C. security policies
- D. entertainment content

<b>Answer: C</b>
