Latest Version: 6.0

Question: 1

A team is planning for a migration to a more modern application server suitable for cloud. What is one of the reasons the team should migrate to Liberty?

Response:

- A. It is closed-source and thus more secure.
- B. It has a high server throughput than other Java EE application servers.
- C. It has one of the fastest startup times of any Java EE application servers
- D. It fully supports applications running in traditional WebSphere Application Server.

Answer: C

Question: 2

How does Open Liberty's zero migration guarantee benefit application development?

Response:

- A. It ensures that applications must be updated with each runtime version.
- B. It enables developers to use deprecated APIs without any performance impact.
- C. It provides stability and predictability for applications across runtime updates.
- D. It restricts the application to use only those features available in the initially deployed runtime version.

Answer: C

Question: 3

Which protocol is used by OpenID Connect for authentication and authorization to build identities that uniquely identify users?

Response:

- A. LTPA 1
- B. OAuth 2.0
- C. Kerberos 1.0
- D. User Registry

Answer: B

Question: 4

Which statement is true about the jdbc driver tracing?

Response:

- A. No log writers are provided for common database vendors.
- B. Trace can be set in the bootstrap.properties file or server.xml.
- C. servlet-3.0 is a required feature for enabling jdbc driver trace.
- D. Supplemental tracing is an invalid option if driver does not support custom tracing.

Answer: B

Question: 5

Which statement is true about the user-defined Liberty feature manifest file?

Response:

- A. Subsystem-Name is a required header.
- B. It uses a custom type of Subsystem: osgi.system.feature.
- C. Attributes take the form name:=value, but directives take the form name=value.
- D. It uses the Subsystem Service metadata format in the OSGi Enterprise R5 specification.

Answer: D

Question: 6

Which Jakarta EE 10.0 programming model web services technology is supported on all Liberty editions?

Response:

- A. Jakarta XML Web Services 3.0
- B. Jakarta Web Services Metadata
- C. Jakarta RESTful Web Services (JAX-RS) 3.1
- D. Jakarta Architecture for XML Binding 3.0

Answer: C

Question: 7

Which Java EE 8 programming enterprise application technology is supported on Liberty core?

Response:

-
- A. J2EE Management 1.13
 - B. Java Transaction API (JTA) 1.3
 - C. Java Message Service (JMS) API 2.0
 - D. Java EE Connector Architecture (JCA) 1.7

Answer: B

Question: 8

Which statement is true about Liberty zero-migration architecture?
Response:

- A. Liberty images update automatically.
- B. Liberty runtime is automatically updated on startup.
- C. Liberty only releases security fixes which do not require migration.
- D. The same version of configuration files can be used across multiple versions.

Answer: D

Question: 9

What does an LTPA token contain?
Response:

- A. Application Server credentials
- B. Application IP address and cookie
- C. ApplicationID and Last Accessed time
- D. User information and expiration time

Answer: D
