Question: 1

During the migration to a Hitachi NAS Platform, which types of data should be prioritized for initial transfer?

(Choose two)

Response:

- A. Least accessed data
- B. Mission-critical data
- C. Encrypted data only
- D. Data in use by legacy applications

Answer: B,D

Question: 2

Which of the following are benefits of using Jumbo frames on the Hitachi NAS Platform?

(Choose two)

Response:

- A. Reduced overhead
- B. Increased latency
- C. Improved throughput
- D. Enhanced encryption

Answer: A,C

Question: 3

For ensuring high availability in a Hitachi NAS Platform deployment, which redundancy features should be included in the plan?

(Choose two)

Response:

- A. Use of a single HBA for cost savings
- B. A single network path to ensure simplicity
- C. Redundant network paths
- D. Redundant power supplies

Answer: C,D

Question: 4

Hitachi best practices recommend using _____ zoning in SAN environments for enhanced security and manageability.

Response:

- A. soft
- B. hard
- C. dynamic
- D. none of the above

Answer: B

Question: 5

In pre-deployment planning for a Hitachi NAS Platform, what factors should influence the design of the data protection strategy?

(Choose two)

Response:

- A. Legal and compliance requirements
- B. The personal preferences of the company's CEO
- C. The recovery time objective (RTO) and recovery point objective (RPO)

Answer: A,C

Question: 6

SyncDR with Hitachi NAS Platform clustering is best suited for environments:

Response:

- A. With minimal data protection requirements.
- B. That can tolerate several hours of data loss.
- C. Requiring instant failover and zero data loss.
- D. Lacking network connectivity.

Answer: C

Question: 7

Configuring and managing iSCSI in Hitachi NAS Platform is essential for:

Response:

- A. Enhancing file sharing capabilities
- B. Supporting direct attached storage devices
- C. Decreasing network traffic
- D. Facilitating block-level storage access over IP networks

Answer: D

Question: 8

The Hitachi NAS Platform integrates with existing customer networks using which protocol for file sharing?

Response:

- A. HyperText Transfer Protocol (HTTP)
- B. Server Message Block (SMB)
- C. AppleTalk Filing Protocol (AFP)
- D. Internet Small Computer Systems Interface (iSCSI)

Answer: B

Question: 9

When deploying Hitachi NAS in a customer environment, which feature ensures data compliance and governance?

Response:

- A. Data deduplication
- B. File-level cloning
- C. WORM (Write Once, Read Many) capabilities
- D. Load balancing

Answer: C

Question: 10

What does NFS stand for, and what is it primarily used for?

Response:

- A. Network File System, used for enabling file sharing across a network
- B. New File System, used for creating new file systems on disk
- C. Non-Faulty System, used for creating robust file systems
- D. Network Function Service, used for networking services

Answer: A
