- D. terraform workspace dev

Answer: B

Question: 3

True or False? Performing a terraform plan can modify the existing Terraform state file.
Response:

- A. True
- B. False

Answer: B

Question: 4

Your company has a lot of workloads in AWS , and Azure that were respectively created using CloudFormation , and AzureRM Templates. However , now your CIO has decided to use Terraform for all new projects , and has asked you to check how to integrate the existing environment with terraform code. What should be your next plan of action?

Response:

- A. Just write the terraformconfig file for the new resources , and run terraform apply , the state file will automatically be updated with the details of the new resources to be imported.
- B. Use terraform import command to import each resource one by one.
- C. Tell the CIO that this is not possible . Resources created in CloudFormation , and AzureRM templates cannot be tracked using terraform.
- D. This is only possible in Terraform Enterprise , which has the TerraformConverter exe that can take any other template language like AzureRM and convert to Terraform code.

Answer: B

Question: 5
