## Question: 1

When considering the architecture of a clustered deployment of VMware vRealize Automation, which two components will require the configuration of an external load balancer? (Choose two.)

- A. vRealize Suite Lifecycle Manager
- B. vRealize Automation
- C. VMware Identity Manager
- D. PostgreSQL Database
- E. vCenter Server

**Answer: BC**

vRealize Lifecycle Manager: vRealize Lifecycle Manager does not support a highly available deployment. vRealize Automation: Content is replicated in a vRealize Automation cluster. Deploy a cluster behind a load balancer to enable high availability. VMware Identity Manager: Content is replicated in a VMware Identity Manager cluster. Deploy a cluster behind a load balancer to enable high availability <https://docs.vmware.com/en/vRealize-Automation/8.1/vrealize-automation-reference-architecture.pdf>

## Question: 2

An administrator is tasked with creating cloud zones for an existing Amazon Web Services (AWS) cloud account.

Which type of compute resource can be added to the cloud zone?

- A. Cluster
- B. Elastic Cloud Compute (EC2) Instances
- C. Availability Zones
- D. Virtual Private Cloud (VPC)

**Answer: C**

<https://docs.vmware.com/en/VMware-Cloud-Assembly/services/Using-and-Managing/GUID-9E6FE02D-2519-4C5B-85BD-2330B8421D73.html#GUID-9E6FE02D-2519-4C5B-85BD-2330B8421D73>

## Question: 3

An administrator configures cloud accounts for vSphere, Amazon Web Services and Google Cloud Platform. Each public cloud account has a single region configured, with a single cloud zone associated with each. Company policy states that all development workloads should be deployed to the public cloud. The administrator wants to ensure that when creating blueprints for this project an appropriate

constraint tag is specified to meet the placement policy and that App-Dev users are allowed to select whether to deploy the machine to production or development. The tagging strategy states that development environments should be tagged with “dev” and production environments should be tagged “prod”.

Which two actions should the administrator take to ensure the objective is met? (Choose two.)

- A. Add a capability tag to each public cloud zone, using env:prod as the key/value pair.
- B. Add a capability tag to each vSphere cloud zone, using env:prod as the key/value pair.
- C. Add a capability tag to each public cloud zone, using env:dev as the key/value pair.
- D. Add a capability tag to each vSphere cloud zone, using env:dev as the key/value pair.
- E. Add a capability tag to each cloud account, using env:prod as the key/value pair.

**Answer: BC**

### Question: 4

What are two purposes of projects in vRealize Automation? (Choose two.)

- A. Add cloud accounts
- B. Map compute resources to users and groups
- C. Organize image mappings
- D. Create tenants
- E. Configure custom naming

**Answer: BE**

<https://vmguru.com/2020/03/create-custom-names-with-vrealize-automation-8/>

### Question: 5

Which vRealize Suite product helps an administrator understand the monetary impact of individual deployments and manage costs in vRealize Automation?

- A. vRealize Log Insight
- B. vRealize Operations
- C. vRealize Network Insight
- D. vRealize Suite Lifecycle Manager

**Answer: B**

<https://docs.vmware.com/en/vRealize-Operations-Manager/7.5/com.vmware.vcom.config.doc/GUID-9D162B8A-FBF8-4713-901C-6E3A1A5B7AEA.html>
