Question: 1

You need to implement the management app. The solution must meet the technical requirements. What should you use?

- A. a PowerShell session to litwareinc.com
- B. a browser session to litwareinc.com
- C. a PowerShell remoting session to the PEP
- D. a browser session to the administrator portal

Answer: D

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-manage-portals?view=azs-2008>

Question: 2

HOTSPOT

You need to identify the certificate for the integrated system in Chicago. The solution must meet the technical requirements.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Certificate issuer:

	▼
Enterprise CA	
Public CA	
Self-signed	

Certificate subject name:

	▼
adminmanagement.northcentralus.litwareinc.com	
adminportal.northcentralus.litwareinc.com	
management.northcentralus.litwareinc.com	

Answer:

Certificate issuer:

	▼
Enterprise CA	
Public CA	
Self-signed	

Certificate subject name:

	▼
adminmanagement.northcentralus.litwareinc.com	
adminportal.northcentralus.litwareinc.com	
management.northcentralus.litwareinc.com	

Explanation:

When deploying Azure Stack Hub in disconnected mode it is recommended to use certificates issued by an enterprise certificate authority. This is important because clients accessing Azure Stack Hub endpoints must be able to contact the certificate revocation list (CRL).

Question: 3

HOTSPOT

You need to register the northcentralus region.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

<table border="1"><tr><td></td><td>▼</td></tr><tr><td colspan="2">Register-AzsEnvironment</td></tr><tr><td colspan="2">Register-AzureRmResourceProvider</td></tr><tr><td colspan="2">set-AzContext</td></tr><tr><td colspan="2">Set-AzsRegistration</td></tr></table>		▼	Register-AzsEnvironment		Register-AzureRmResourceProvider		set-AzContext		Set-AzsRegistration		-PrivilegedEndpointCredential \$CloudAdminCred -PrivilegedEndpoint \$PrivilegedEndpoint

Question: 4

HOTSPOT

You need to identify the authentication and authorization process for the integrated system in Chicago. The solution must meet the technical requirements.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To configure authentication, create:

<input type="checkbox"/>	An AD FS claims provider trust
<input type="checkbox"/>	An AD FS relying party trust
<input type="checkbox"/>	An Azure AD service principal

To configure authorization, use:

<input type="checkbox"/>	An Active Directory user account that has read access to Active Directory
<input type="checkbox"/>	An Azure AD service principal that has read access to Azure AD
<input type="checkbox"/>	An Azure AD user account that has read access to Azure AD

Answer:

To configure authentication, create:

<input type="checkbox"/>	An AD FS claims provider trust
<input checked="" type="checkbox"/>	An AD FS relying party trust
<input type="checkbox"/>	An Azure AD service principal

To configure authorization, use:

<input type="checkbox"/>	An Active Directory user account that has read access to Active Directory
<input checked="" type="checkbox"/>	An Azure AD service principal that has read access to Azure AD
<input type="checkbox"/>	An Azure AD user account that has read access to Azure AD
