There are 2 correct answers to this question.
Response:

- A. When the query filter involves values that are known
- B. When the query filter involves values that are not known

- C. When the query filter for the report involves a value that will change over time
- D. When the query filter for the report involves a value that will never change over time

Answer: BC

Question: 10

Explain the different types of data changes that Web Intelligence can highlight with the data tracking feature?

There are 2 correct answers to this question

Response:

- A. Multiple data
- B. Duplicate data
- C. Removed data
- D. Modified data

Answer: CD

Question: 11

From the following identify which of the option is not a method to copy a chart from Web Intelligence to a target application?

Please choose the correct answer.

Response:

- A. Right-click the chart, and, from the contextual menu, select Copy.
- B. In the target document, right-click the section cell and, from the contextual menu, click Copy
- C. In the target document, right-click the area where you want the table to appear and, from the contextual menu, select Paste
- D. Drag and drop the table from Web Intelligence to the target application

Answer: B

Question: 12

Which three rules apply when you manually synchronize queries?

There are 3 correct answers to this question.

Response:

- A. Dimension value formats must be the same.
- B. Dimensions with different names can be merged.

- C. Dimensions with different data types can be merged.
- D. Dimensions from multiple data sources can be merged.

Answer: ABD

Question: 13

Which two statements are true of grouping sets when using smart measures?

Please choose the correct answer.

Response:

- A. It is a set of dimensions that generates a result for a measure.
- B. It is a set of measures that generates a result for a dimension.
- C. The generated SQL includes grouping sets for all the aggregations of that dimension that are included in the report.
