Question: 1

How can you check if key figure is editable or non-editable?

A. Using the Web-based Planning app when selecting key figures
B. Using the Key Figure Calculations app
C. Using the Edit View and then the Edit Planning View option
D. Using the Analytics Advanced app when selecting key figures

Answer: A

Question: 2

Which of the following are the key features of SAP Supply Chain Control Tower? Note: There are 2 correct answers to this question.

A. Ability to balance demand and supply and attain financial targets
B. Ability to create a feasible plan
C. Ability to use task and case management
D. Ability to create smart alerts

Answer: C,D

Question: 3

What are S&OP operator (optimizer) parameters associated with demand fair share?

A. Number of fair share segments. Maximum days of coverage. Number of fair share segments late delivery
B. Number of fair share segments. Additional tiering costs (default). Number of fair share segments late delivery
C. Number of fair share segments. Maximum inventory. Additional tiering costs (default)
D. Number of fair share segments. Additional tiering costs (default). Target inventory violation cost
E. You want to copy a custom planning area that was built during the SAP IBP implementation to model a separate process.

Answer: B

Question: 4

Why would you set up a cascading filter in the planning view? Note: There are 2 correct answers to this question.

A. To filter attributes based on other attribute filters
B. To filter using attributes that have a large number of values
C. To filter data in an Application Job template
D. To filter attributes based on specific values

Answer: A,B

Question: 5

You are creating advanced copy operators as part of an SAP IBP solution that is being implemented. What do you need to be aware of when defining data transfer? Note: There are 2 correct answers to this question.

A. Specifying target key figure is mandatory.
B. Specifying target key figure that is time independent is possible.
C. Specifying source key figure is mandatory.
D. Selecting by attribute with option 'contain' is possible.

Answer: A,C

Question: 6

What type of key figure requires a planning level to have all attributes as roots?

A. The conversion key figure, such as exchange rate
B. The special key figure marked as an aggregate key figure
C. The time independent key figure, such as FCSTMAPE
D. The attribute transformation key figure, such as PERIODID1

Answer: B

Question: 7

You want to set up demand sensing to analyze demand changes in execution or close to execution windows. Which of the following conditions must you consider during the setup? Note: There are 2 correct answers to this question.

A. At setup test the system to run the demand sensing (full) algorithm weekly and the demand sensing (update) on a daily basis.
B. The result generates sensed demand data at the monthly time granularity for the full time horizon.
C. Set up the forecast model to be executed at product-location level.
D. It is mandatory to load historical lag-based snapshot data.

Answer: A,D

Question: 8

The Analytics Advanced app allows you to work with different types of charts. What can be the origin of the charts you can work with?

A. SAP IBP VBA Add-in template
B. Process Templates
C. Custom Alerts
D. Dashboards Advanced

Answer: A

Question: 9

How can you make charts and dashboards private?

A. Choose only relevant key figures and filters in the Analytics Advanced application.
B. Enable the relevant settings in the global configuration parameters.
C. Set restrictions for charts in the Permission filter application.
D. Enable the relevant settings in the Analytics Advanced and Dashboards Advanced applications.

Answer: B

Question: 10

Which of the following stages can be modeled using scenarios from the S&OP planning cycle? Note: There are 2 correct answers to this question.

A. Demand sensing stage
B. Data input review for inventory

C. Demand review
D. Demand-supply balancing

Answer: C,D
