

## Question: 1

Your customer needs to link two queries with a report-report interface( RQ transaction RSBBS which parameters do you set in the query sender to jump to the query receiver.

There are 3 correct answers to this question.

Response:

- A. Sender system
- B. Receiver object
- C. Target system
- D. RFC Destination
- E. Report type

**Answer: ABC**

## Question: 2

You need to load data from a data from a Datasource directly to an info-cube.Which of the following delta processes can you use for the data source?

There are 2 correct answers to this question.

Response:

- A. AIMD After-image with delection flag via delta queue.
- B. ABR Complete Delta with deletion flag via delta Queue.
- C. AIM After-image via Delta queue
- D. ADD Additive Extraction Via Extractor

**Answer: BD**

## Question: 3

You need to create an SAP Business Warehouse data flow that combines data from two sources in an advanced Datastore object(DSO).There are different and value for the same entry in the source.Which approach does SAP recommend?

Please choose the correct answer.

Response:

- A. Create an open ODS as a non-persistent intermediate layer to perform a join from the source dependent parts need to be implemented in the same transformation.
- B. Create an infosource as a non-persistent intermediate layer.the source-dependent parts of the a transformation need to be implemented before the info source.

- 
- C. Create a composite provider as a non-persistent intermediate layer to perform a join from the source.the source-dependent parts need to be implemented in the same transformation.
  - D. Create an infoset as a non-persistent intermediate layer.the source-dependent parts of the transformation need to be implemented before the info set.

**Answer: C**

## Question: 4

Your customer wants to activate SAP HANA-Optimized business content to store historical data.which layer do you use?

Please choose the correct answer.

Response:

- A. Virtual data mart layer
- B. Corporate memory layer
- C. ODS layer

**Answer: B**

## Question: 5

Which sources are available for a generic SAP Business Warehouse DataSource?

There are 3 correct answers to this question.

Response:

- A. DB view or table
- B. SAP HANA information view
- C. Function module
- D. SAP HANA remote source table
- E. SAP query (InfoSet)

**Answer: ACE**

## Question: 6

As part of currency translation, a quantity conversion type can be defined to convert the quantity of a currency into the new currency. Determine whether this statement is true or false.

- A. True
- B. False

---

**Answer: B**

## Question: 7

Non-cumulative key figures are values calculated according to a particular period of time and the value is then incremented or decremented based on an inflow or outflow. Determine whether this statement is true or false.

- A. True
- B. False

**Answer: A**

## Question: 8

Which of the following statements regarding Advanced DataStore Objects (ADSOs) are correct?

- A. The keys of an ADSO can be a mixture of InfoObjects and fields.
- B. Non-cumulative key figures cannot be included in ADSOs.
- C. ADSOs can have up to 120 key fields.
- D. A direct update ADSO does not have an Inbound Table or a Change Log.
- E. ADSOs cannot be used as a source in a transformation for another ADSO.

**Answer: A, C, D**

## Question: 9

Which of the following statements describe the advantages of CompositeProviders over the classic MultiProviders/InfoSets?

- A. CompositeProviders provide joins and unions with a single object.
- B. CompositeProviders can also include joins to classic MultiProviders.
- C. CompositeProviders integrate with all the BW InfoProviders.
- D. A CompositeProvider can be consumed by another CompositeProvider.
- E. Classic MultiProviders have to be recreated as CompositeProviders.

**Answer: A, C, D**

## Question: 10

---

To model the tracking history scenarios of historical truth and current truth, two different star schemas are required. Determine whether this statement is true or false.

- A. True
- B. False

<b>Answer: B</b>
------------------

### Question: 11

If an InfoSource is used in front of an InfoProvider and an outbound InfoSource after an InfoProvider, the transformation logic is always located between the outbound InfoSource of the source InfoProvider and the inbound InfoSource of the target InfoProvider. Determine whether this statement is true or false.

- A. True
- B. False

<b>Answer: A</b>
------------------

### Question: 12

Data Models in BW can be made available in SAP HANA using the manual pull mechanism or automatically using the push function which is set in the BW InfoProvider properties. Determine Whether this statement is true or false.

- A. True
- B. False

<b>Answer: A</b>
------------------

### Question: 13

If a global element of a query is changed in BW, these changes are automatically passed to the SAP HANA calculation view that was created from the BW query. Determine Whether this statement is true or false.

- A. True
- B. False

---

**Answer: B**

### Question: 14

Workspace Query Designer can be used to create queries that can be used across the entire company because the tool is really using BEX Query Designer. Determine Whether this statement is true or false.

- A. True
- B. False

**Answer: B**

### Question: 15

When used for planning, Real Time InfoCubes contain a single table and Advanced Data Store Objects comprise two tables for storing compressed and uncompressed data. Determine Whether this statement is true or false.

- A. True
- B. False

**Answer: A**

### Question: 16

The EDW Core Layer includes all layers that contain consolidated and harmonized data. Determine Whether this statement is true or false.

- A. True
- B. False

**Answer: A**

### Question: 17

Using the Remodeling Toolbox, InfoObjects can be changed without having to delete or reload master data. Determine Whether this statement is true or false.

- A. True
- B. False

---

**Answer: A**

**Question: 18**

By using a MultiProvider on top of each InfoCube to control query access, you significantly reduce the effort required, for example, to copy queries after remodeling takes place. Determine Whether this statement is true or false.

- A. True
- B. False

**Answer: A**
