

Latest Version: 33.0

Question: 1

HOTSPOT

You need to configure a conditional access policy to meet the compliance requirements.

You add Exchange Online as a cloud app.

Which two additional settings should you configure in Policy1? To answer, select the appropriate options in the answer area.

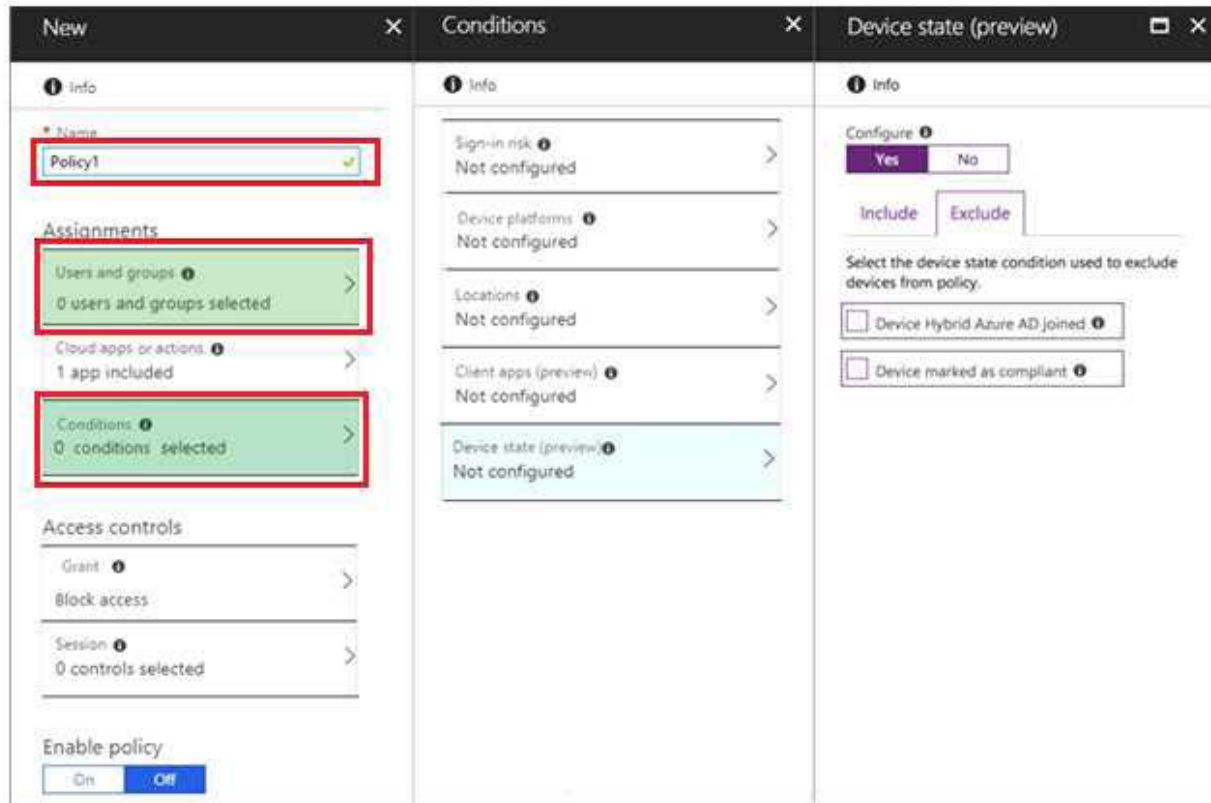

NOTE: Each correct selection is worth one point.

The screenshot displays the Microsoft Conditional Access policy configuration interface, divided into three main sections:

- New:** Shows the policy name "Policy1" and various assignment and access control options. The "Conditions" section is highlighted in light blue, indicating it is the current selection.
- Conditions:** Lists several criteria that are currently "Not configured":
 - Sign-in risk
 - Device platforms
 - Locations
 - Client apps (preview)
 - Device state (preview) (highlighted in light blue)
- Device state (preview):** Includes a "Configure" toggle set to "Yes", "Include" and "Exclude" buttons, and two checkboxes for device state conditions:
 - Device Hybrid Azure AD joined
 - Device marked as compliant

Answer:

Question: 2

On which server should you install the Azure ATP sensor?

- A. Server 1
- B. Server 2
- C. Server 3
- D. Server 4
- E. Server 5

Answer: A

References:

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/atp-capacity-planning>

However, if the case study had required that the DCs can't have any s/w installed, then the answer would have been a standalone sensor on Server2. In this scenario, the given answer is correct. BTW, ATP now known as Defender for Identity.

Question: 3

You need to meet the compliance requirements for the Windows 10 devices.
What should you create from the Intune admin center?

- A. a device compliance policy
- B. a device configuration profile
- C. an application policy
- D. an app configuration policy

Answer: D

Question: 4
