

Latest Version: 7.0

Question: 1

Why should you run an SAP HANA delta merge? Note: There are 2 correct answers to this question.

- A. To decrease memory consumption
- B. To combine the query cache from different executions
- C. To improve the read performance of InfoProviders
- D. To move the most recent data from disk to memory

Answer: A,C

Question: 2

For which requirements do you suggest an SAP HANA modeling focus rather than an SAP BW/4HANA modeling focus? Note: There are 2 correct answers to this question.

- A. Load snapshots or deltas from different sources on a periodic basis
- B. Leverage SQL in-house knowledge
- C. Enhance existing SAP HANA content models
- D. Report on a harmonized set of master data

Answer: B,C

Question: 3

In the Web IDE for SAP HANA workspace, you have imported a project including an HDB module with calculation views. What do you need to do in the project settings before you can successfully build the HDB module?

- A. Enter an organization
- B. Assign a space
- C. Reset the project type
- D. Define a package

Answer: C

Question: 4

The Database Explorer in the Web IDE for SAP HANA provides a data file import wizard to create a table in SAP HANA from a flat file. What are possible actions after the system suggests the target structure?
Note: There are 3 correct answers to this question.

- A. Map InfoObjects to fields in the target table.
- B. Adjust the suggested data type of the target table fields.
- C. Define sorting properties for a target table field.
- D. Switch the table type between row store and column store.
- E. Change the order of the fields in the target table.

Answer: A,D,E

Question: 5

You would like to highlight the deviation from predefined threshold values for key figure actual revenue. Which BW feature do you use?

- A. Structure
- B. Calculated key figures
- C. Conditions
- D. Exceptions

Answer: D

Question: 6

You created an Open ODS view of type Facts. Which object type can you associate with a view field in the characteristics folder? Note: There are 2 correct answers to this question.

- A. Open ODS view of type Facts
- B. Calculation View of type Dimension
- C. Open ODS view of type Master Data
- D. InfoObject of type Characteristic

Answer: B,C

Question: 7

With which query considerations can you optimize the query performance? Note: There are 3 correct answers to this question.

- A. Use exclude functions in the restricted key figures
- B. Use mandatory characteristic value variables
- C. Use characteristic filters that overlap
- D. Use fewer drill-down characteristics in the initial view
- E. Use include functions in the restricted key figures

Answer: A,B,D

Question: 8

In an SAP HANA Calculation View, you need to combine attributes data (left table) and the data's language-dependent texts (right table) using a text join. What should you select to restrict the result set to the logon language?

- A. The language column in the right table
- B. The join cardinality between both tables
- C. The logon language in the left table
- D. The language column in the left table

Answer: A

Question: 9

Which of the following are possible source types for an Open ODS view? Note: There are 3 correct answers to this question.

- A. Database table or view
- B. Open hub destination
- C. CompositeProvider
- D. Transformations
- E. DataStore object (advanced)

Answer: A,D,E

Question: 10

With SAP BW/4HANA 2.0, SAP introduced a new capability called Write Interface for DataStore objects (advanced). Which SAP solutions can leverage this interface to push data into the inbound table of DataStore objects (advanced)? Note: There are 3 correct answers to this question.

- A. SAP Data Services
- B. SAP Landscape Transformation Replication Server

- C. SAP Process Integration
- D. SAP Business Technology Platform
- E. SAP Data Warehouse Cloud

Answer: B,D,E
