Question: 1

What data is included when you replicate campaigns from SAP CRM to SAP Cloud for Customer?

- A. Campaign header
- B. Campaign templates
- C. Campaign target groups
- D. Campaign item

Answer: A

Question: 2

You are using SAP Cloud Platform Integration as your middleware. You need to configure basic authentication to send messages from SAP S/4HANA to SAP Cloud for Customer. What are the configuration steps for SAP Cloud Platform Integration? Note: There are 2 correct Answers to this question.

- A. Deploy a user credential artifact on SAP Cloud Platform Integration containing the user ID of the SAP S/4HANA communication user.
- B. Deploy a user credential artifact on SAP Cloud Platform Integration containing the user ID of the SAP Cloud for Customer communication user.
- C. Update the integration flow parameters with the host of SAP Cloud for Customer and the relevant credential name.
- D. Update the integration flow parameters with the host and path of the SAP Cloud for Customer Web service.

Answer: A,C

Question: 3

What is SAP's recommendation for data filtering when using IDoc communication?

- A. Use the standard filtering fields in the ALE distribution model. If this is NOT sufficient, use the IDOC_CREATION_CHECK BAdI.
- B. Use the change pointers BAdI, IDOC_DATA_MAPPER. If this is NOT sufficient, use the IDOC_CREATION_CHECK BAdI.
- C. Use custom BAdIs to ensure other integrations are NOT impacted by SAP Cloud for Customer integration.

D. Use a condition filter in the middleware to ensure other integrations are NOT impacted and all filtering logic can be maintained in one central place.

Answer: A

Question: 4

The following screenshot is an IDoc error from SAP ERP. What does the error message shown in the screenshot indicate?

No IDoc saved in target system (SOAP HTTP)

Message no. EA391

Diagnosis

The SOAP application was started in the target system. However, errors occurred in the target system, which mean that IDocs cannot be saved.

The following error message was sent: [CXF][Transport][HttpException]:HTTP response '401: Unauthorized' when communicating with <https://my306800.crm.ondemand.com/sap/bc/srt/scs/sap/businesspartnererpreplication1?MessageId=0050563F-060D-1E>

Procedure

Inform your system administrator.

- A. The error indicates that the SAP Cloud for Customer server certificate has expired.
- B. The error indicates that the SAP Cloud Platform Integration client certificate has expired.
- C. The error indicates missing authorization when the message is received in SAP Cloud Platform Integration.
- D. The error indicates invalid authentication when the message is received in SAP Cloud for Customer.

Answer: B

Question: 5
