Question: 1

HOTSPOT

A shipping company uses a Pega application for order processing and fulfillment.

- ◆The Membership level locally-sourced data type indicates the membership level of the customer.
- ◆The Address data type is used to verify the customer-entered billing and shipping addresses against a comprehensive database of postal addresses.
- ◆The Delivery preference data type specifies whether the customer prefers the delivery person to call the customer or ring the doorbell when dropping off a package.

In the graphic below, choose the appropriate data type based on how it is sourced.

Answer:

Question: 2

A requirement for a hotel reservation case type states that as customers change their room selection, the total cost of the reservation updates accordingly.
