Question: 1

Select the three true statements about the use of a BLOB field.

(Choose Three)

Response:

- A. A BLOB automatically exposes properties for reporting.
- B. A BLOB provides flexibility by avoiding the need for schema changes when the data model changes.
- C. A BLOB can store an object of any size.
- D. A BLOB allows an application to read or write an entire case in one database transaction.
- E. Case data can only be stored in a BLOB.

Answer: B,C,D

Question: 2

You have designed a decision tree that you want to unit test. You want to verify that every row can be evaluated regardless of the input values. How would you test your decision tree?

Response:

- A. Use a test page to run the decision tree.
- B. Check the decision tree for completeness.
- C. Add the decision tree to a decision shape and create cases using various test values.
- D. Check the decision tree for conflicts.

Answer: D

Question: 3

You use the Clipboard tool to perform which two tasks?

(Choose Two)

Response:

- A. Test a rule to determine whether the rule executes correctly.
- B. Test case behavior by setting property values for an open case.
- C. Review the current values of case data.
- D. Test whether a declarative expression properly calculates a target value.

Answer: B,C

Question: 4

A branch ruleset is a ruleset that _____.

(Choose Two)

Response:

- A. Is based off of another ruleset
- B. Is designed for large projects
- C. Prevents developers from seeing work of all team members
- D. Contains rules that are not in active development

Answer: A,B

Question: 5

You create a product rule to generate an application archive file for export. Which two actions do you perform before creating the archive file?

(Choose Two)

Response:

- A. Associate application data instances with application rulesets.
- B. Create a new version of the application.
- C. Check in the rules that are in the application's rulesets.
- D. Unlock the application rulesets.

Answer: A,C

Question: 6

Which two of the following are prerequisites for creating a branch rule for parallel development?

(Choose Two)

Response:

- A. Create an access group that references the team application. Add developers to the access group.
- B. Create a team application.
- C. Circumstance the original rule.
- D. Save a copy of the original rule into the base ruleset.

Answer: A,B

Question: 7

Business metrics are used to _____.

Response:

- A. provide statistics on how work is performed in Pega applications
- B. manage data instances for an application
- C. describe and measure what the organization's work is
- D. define the data types for an application

Answer: D

Question: 8

What is the purpose of the Enterprise Class Structure (ECS)?

Response:

- A. ECS is used to alter the performance of the Pega Platform.
- B. ECS documents industry or enterprise standards that applications must contain.
- C. ECS references single-value properties and complex properties
- D. ECS provides a structure supporting rule reuse.

Answer: D

Question: 9

What three questions can you ask to help you plan user views?

(Choose Three)

Response:

- A. Can users modify the values or only read the values?
- B. What fields do users need to see?
- C. Will the information be stored in an external database?
- D. How will users enter values in those fields?
- E. Will users want to see information displayed using different styles?

Answer: A,B,D

Question: 10

Which statement best describes the role of the base rule in circumstancing?

Response:

- A. The base rule is a template, used to create all of the circumstanced variants.
- B. The base rule is used if no circumstanced variant applies.
- C. The base rule describes case behavior in effect until a certain date.
- D. The base rule lists all of the properties for which a rule can be circumstanced.

Answer: B
